To Whom It May Concern:

This letter is in reference to Arnie Silva, a professional Senior Engineer at National Grid.

Over the course of my ten years here at National Grid, I have had the pleasure of working with Arnie for most of those years. Arnie is a highly skilled professional working within a top functioning department. Our Reliability Analytics group consistently meets its internal and regulatory goals, and he has been instrumental in our data management systems to enable cross functional utilization.

More specifically to Arnie, with whom I have had many occasions to interact with as an internal customer, and his former manager, he has demonstrated continuous improvement. Arnie has always conducted himself professionally and respectfully, while at the same time achieving many company objectives to the satisfaction and beyond for our internal and external stakeholders. He constantly seeks to improve upon current processes or re-think an approach that can be integrated with pre-existing data sets and models.

I also know, by virtue of many hours working closely with Arnie and learning about him, his passion and ever-growing interest drives his continuous desire to learn from experience and what is yet to come.

Without reservation, I recommend Arnie for your consideration.

If you have any questions or would like additional detail, please do not hesitate to contact me.

Sincerely,

Bertram H. Stewart III
